**Why you need dental insurance in retirement.**

Many Americans are fortunate to have dental coverage for their entire working life, through employer-provided benefits. When those benefits end with retirement, paying dental bills out-of-pocket can come as a shock, leading people to put off or even go without care.

Simply put – without dental insurance, there may be an important gap in your healthcare coverage.

**When you're comparing plans...**

- ▶ Look for coverage that helps pay for major services. Some plans may limit the number of procedures – or pay for preventive care only.
- ▶ Look for coverage with no deductibles. Some plans may require you to pay hundreds out of pocket before benefits are paid.
- ▶ Shop for coverage with no annual maximum on cash benefits. Some plans have annual maximums of \$1,000.

**Medicare doesn't pay for dental care.<sup>1</sup>**

That's right. As good as Medicare is, it was never meant to cover everything. That means if you want protection, you need to purchase individual insurance.

**Early detection can prevent small problems from becoming expensive ones.**

The best way to prevent large dental bills is preventive care. The American Dental Association recommends checkups twice a year.

**Previous dental work can wear out.**

Even if you've had quality dental work in the past, you shouldn't take your dental health for granted. In fact, your odds of having a dental problem only go up as you age.<sup>2</sup>

**Treatment is expensive – especially the services people over 50 often need.**

Consider these national average costs of treatment ... \$217 for a checkup ... \$189 for a filling ... \$1,219 for a crown.<sup>3</sup> Unexpected bills like this can be a real burden, especially if you're on a fixed income.

**"I don't worry"**

"Now that I have your dental policy, I don't worry about going to the dentist. I love your plan – you pay what you say!"  
 Colleen W., MO
